

ESCA 2018 AWARD
CALL FOR NOMINATIONS

Important dates: July 15th, 2017; *deadline for nominations*
December 15th, 2017; *deadline for award decision*

Candidates will be presented by any delegate from the Division of Chemistry and the Environment (DCE) or the Division of Green and Sustainable Chemistry (DGSC). Any EuCheMS member society or any EuCheMS member can request the DCE or DGSC delegate of their Member Society to nominate a candidate. The ESCA award is given in recognition of 1) the lifelong research and activities carried out by the awardee, or 2) as a consequence of an outstanding specific contribution to the fields, within the remit of the DCE and DGSC.

The first call for candidates of the new ESCA award, to be delivered on the ECC7 in Liverpool 2018, will be open from April 30th until July 15th, 2017. The nomination of a candidate needs to include a short resume (no more than 4 pages) and a cover letter (no more than 3 pages) including the main reasons and contributions considered to make him/her a suitable recipient of the prestigious ESCA award.

The chairs of the two Divisions will exchange the documentation received by July 15th and forward to the different members of the committee nominated for the selection of the ESCA award. The committee will evaluate the nominated candidates on their corresponding merits and will take a decision not later the December 15th, 2017.

The final decision will be communicated to EuCheMS and to the delegates of both Divisions and finally to the awardee and made public through the EuCheMS and Divisional web pages.

The 2018 ESCA award will be sponsored by InKemia Green Chemicals (inkemiagreenchemicals.com)
