

Public stakeholder consultation - Interim evaluation of Horizon 2020

Fields marked with * are mandatory.

[Horizon 2020](#), with a budget of €77bn from 2014 – 2020, is the biggest European Union research and innovation framework programme ever and one of the largest worldwide. Horizon 2020 promotes Europe's scientific and technological excellence to extend the frontiers of human knowledge, boosts the European Union's economic competitiveness and addresses societal challenges.

We invite everyone to take part in this public stakeholder consultation in the context of the interim evaluation of Horizon 2020, and to have a say on research and innovation activities run by the European Commission. The results of this consultation will feed into the report on the interim evaluation of Horizon 2020, will help us to improve the implementation of Horizon 2020 and will set the scene for the future discussions on the next EU research and innovation funding post-2020.

According to the legal act establishing Horizon 2020, the European Commission has to carry out an interim evaluation of the programme by 31 December 2017. Public stakeholder consultation is a very important part of this interim evaluation.

This Horizon 2020 questionnaire consists of six parts and it will take around 20 minutes to respond.

At the end of the questionnaire there is an opportunity to upload a position paper for the interim evaluation of Horizon 2020.

The questionnaire is focused on Horizon 2020 in general. There are/will be separate online consultations on the [Euratom Programme](#), the European Institute of Innovation and Technology ([EIT](#)), and public-public and public-private partnerships ([more information here](#)).

I About You

Funding of basic science through ERC is a success story and should be increased. Funding of market-driven R&D (TRL 6-9) is one of the strengths of H2020, promoting the competitiveness of European industry on short terms. Efforts should be increased, to promote medium-term research (TRL 2-5), such as transferring results from ERC grants to applications. This is essential for keeping European industry competitive in the future and at the forefront of innovation. R&D infrastructure must be strengthened.

IV EFFICIENCY AND EU ADDED VALUE

Part IV takes a closer look at the costs and benefits of participation in Horizon 2020 as well as at the EU added value of Horizon 2020.

*** 17. How do you rate the overall added value of Horizon 2020 compared to national and/or regional level research and innovation programmes in EU Member States?**

Given the fact that on average EU Member States/Regions made cuts to their own budgets for R&I, the consequences for research would be devastating. This would also affect innovation, which needs research, jobs, & would put in peril solutions to societal challenges. The European dimension is essential, even if the same level of funding were provided at the National/Regional level, the quality of science would decrease. Even large countries would not be competitive internationally. Synergies, no duplica

V INTERNAL STRUCTURE OF HORIZON 2020 AND SYNERGY WITH OTHER EU PROGRAMMES

Horizon 2020 offers many funding opportunities and in **part V** we would like to collect information about the internal structure of Horizon 2020. We also look at other European Union funding programmes and their synergies and/or overlaps with Horizon 2020.

20. To what extent do you agree with the following statements regarding the internal structure of Horizon 2020?

*The different parts of Horizon 2020 complement each other	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
*Combining different forms of support for research and innovation under one single programme better addresses stakeholder needs than having separate programmes	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
*The increased use of calls for cross cutting activities and interdisciplinary work is a positive feature in the programme	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
*In general, there is more coherence and synergy between different parts of Horizon 2020 than in the 7th Framework Programme	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

21. The European Commission implements several funding programmes. How would you describe the linkages between Horizon 2020 and the following programmes?

It is not clear that significant funding from ESIF or EFSI has been used for R&D (while the opposite has happened when H2020 budget was cut to fund EFSI).

*** 22. Overall are you so far satisfied with Horizon 2020?**

- Very satisfied
- Satisfied
- Dissatisfied
- Very dissatisfied
- I don't know

VI FORWARD LOOKING QUESTIONS

Horizon 2020 will end in the year 2020 and we would like to have a first overview of relevant issues and feedback for a possible successor programme. The European Commission's goal is to maximize the socio-economic impact of the EU support to research and innovation, so we would like to hear from you what could be done to achieve this.

23. Horizon 2020 mainstreams sustainable development as a cross-cutting issue for collaborative research and dedicates 60% of its budget to sustainable development. Research and innovation is an important driver for the implementation of the Sustainable Development Goals. The FP7 ex-post evaluation concluded that Horizon 2020 and its successors should focus on critical challenges and opportunities in the global context.

Please choose up to 5 [Sustainable Development Goals](#) on which, in your opinion, the future EU framework programmes for research and innovation should focus.

25.1 Please provide here any further comments (if any) on issues you find important regarding a possible successor programme to Horizon 2020.

Fundamental research is the ultimate driver of human progress. Given the fact that industry is stepping back in funding fundamental research, public funding, with a European dimension, must respond to this need. We therefore propose ERC funding should be kept at least at current levels. Funding for TRLs 3-7 should be increased and funding for TRLs >6 should be maintained. In addition, funding redirected to EFSI should come back to H2020 and its possible successor.

26. Please upload a document (e.g. position paper) if you wish to share any further comments /recommendations regarding the implementation of EU framework programmes, and in particular on Horizon 2020.

The maximum file size is 1MB.

Please note that the uploaded document will be published alongside your response to the questionnaire which is the essential input to this open public consultation. The document is an optional complement and serves as additional background reading to better understand your position.
